Dear Stakeholders,

"Planning brings the future into the present so that you can do something about it now."- Alan Lakein

The success of any work depends on how thoroughly and systematically it is planned in advance. Careful planning is the key to effective instructions also. Teaching- learning is a complex process which involves the teacher, pupil, the physical and social environment as well as a set of tasks meant for bringing about desirable behaviour changes.

An annual plan contains all academic and co-curricular activities to be taken in the specified academic year. It gives a detailed description about the units to be covered in each month and the related activities to be undertaken along with the unit. You are requested to consider it as a tool of instructions and abide by it to some extent.

Hoping to lay bedrock for the bright and charismatic future of your ward!

Warm regards!

(Dr. Kalpana Maheshwari)
